

Day-1

Some basic Command Window commands

This command is to change the folder path, and to save the .m file where you wish to and run.

```
cd 'D:\Demo\MAtlab\Day-1'
```

Next we have is clc command to clear the command window, and remember it only clears the command window and it does not destroy the variables and its values

```
clc;
```

Futher,we have clear command to clear all the variable and it values from the workplace.

```
clear;
```

Next we have edit command to open a new editor window.

```
edit
```
